

TRIGGER 10 CSTM

ACTIVE INGREDIENT: 10% Lambda Cyhalothrin Micro Capsulated CS.

TRIGGER 10 CSTM is an insecticide for indoor residual treatment against malaria vectors (mosquitoes).

METHOD OF APPLICATION: Dilute 50 to 70 mls of product into 10 liters of water. Apply the 10 Liters of the spray solution onto 250m² of Wall and ceiling surfaces using high pressure spraying machine.

MAIN ADVANTAGES:

Long residual effect.

High mass control effect resulting from absorption of lethal doses due to less irritation to mosquitoes.

Very effective against most species of mosquitoes.

Better acceptance by residents compared to most other forms of insecticides

Fewer treatments required in a year.

NOTE: To achieve maximum biological efficacy, TRIGGER 10 CSTM is recommended to be sprayed with Compression Sprayer or any other WHO recommended Sprayer For indoor residual treatment.
