Herbicide should be applied with calibrated spray equipment producing a median droplet range of 200 to 300 microns VMD. Apply in a minimum of 50 litres of water per hectare. Use 150 L/ha when spraying dense populations.

DO NOT apply without the addition of an adjuvant. DO NOT use on Gymnosperms (pines, conifers, etc) unless a prior test has been conducted to check safety on the relevant species.

To ensure even mixing, half-fill the spray tank with clean water and add the required amount of product. Add spray additive and agitate thoroughly, then add the remainder of the water. Agitate again before spraying commences.

Application:

**General Application**
DALOT 240 EC™ Herbicide should be applied with calibrated spray equipment producing a median droplet range of 200 to 300 microns VMD. Apply in a minimum of 50 litres of water per hectare. Use 150 L/ha when spraying dense populations.

In a medium number of plants not previously tested.

Ornamentals and Trees - While DALOT 240 EC™ Herbicide is generally selective to broadleaved plants (i.e. it is active against grasses), tests should always be made on a small number of plants not previously tested.

Uptake into the plant is primarily through its leaves. Thorough coverage of the foliage is important for consistent grass control. Susceptible grasses that are actively growing will undergo a burn-back and color change after treatment. Leaf foliage will first change from green to yellowish, then purplish and finally brown color. The time required for complete control is normally 7 to 21 days following treatment, depending on growing conditions and crop competition.

**RESTRAINTS:**

- DO NOT use on Gymnosperms (pines, conifers, etc) unless a prior test has been conducted to check safety on the relevant species.
- DO NOT use on Gymnosperms (pines, conifers, etc) unless a prior test has been conducted to check safety on the relevant species.

**APPLICATION:**

To ensure even mixing, half-fill the spray tank with clean water and add the required amount of product. Add spray additive and agitate thoroughly, then add the remainder of the water. Agitate again before spraying commences.

**DO NOT apply to plants that are stressed by moisture or temperature extremes.**

- DO NOT apply to plants that are stressed by moisture or temperature extremes.

**DO NOT apply without the addition of an adjuvant.**

- DO NOT apply without the addition of an adjuvant.

**Compatibility:**

- DO NOT mix or store this product with any other product.
- DO NOT mix or store this product with any other product.

**Environmental Protection:**

- Avoid environmental pollution with this product.
- Do not contaminate ponds and waterways by direct application, cleaning of equipment, disposal of wastes and empty container.
- Avoid environmental pollution with this product.

**Warranty:**
