Spencer 260 OD™
A selective pre- and early post-emergence herbicide for the control of both annual and broadleaf weeds in maize.

Active Ingredient content:
Mesotrione 4.0% + Nicosulfuron 2.0% + Terbuthylazine 20.0%

Application Timing:
Pre- and early-post; up to and including the early 4th leaf stage of maize

Targeted weeds:
Broadleaf weeds and annual grasses

Spencer 260 OD™ ensures:
- Effective management of both grasses and broad-leaf weeds
- Excellent crop safety
- Flexibility in application timing

Spencer 260 OD™ is a unique mixture of 3 effective active ingredients belonging to different herbicide groups.

Spencer 260 OD™ offers an excellent solution for cost effective, flexible, long lasting weed management in maize!

Active Ingredient content:
Mesotrione 4.0% + Nicosulfuron 2.0% + Terbuthylazine 20.0%

Application Timing:
Pre- and early-post; up to and including the early 4th leaf stage of maize

Targeted weeds:
Broadleaf weeds and annual grasses

Spencer 260 OD™ ensures:
- Effective management of both grasses and broad-leaf weeds
- Excellent crop safety
- Flexibility in application timing

Spencer 260 OD™ is a unique mixture of 3 effective active ingredients belonging to different herbicide groups.

Spencer 260 OD™ offers an excellent solution for cost effective, flexible, long lasting weed management in maize!

Active Ingredient content:
Mesotrione 4.0% + Nicosulfuron 2.0% + Terbuthylazine 20.0%

Application Timing:
Pre- and early-post; up to and including the early 4th leaf stage of maize
