Contents • Batch number • Manufacture date

--

- **Zinc 70™** should preferably be applied early in the morning or late afternoon.
- It is advisable to do a miscibility test prior to mixing **Zinc 70™** with other chemicals.
- Consult with your chemical distributor should crop specific programmes or any other information be required about the use of **Zinc 70™**.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED

CROP	MAX. RATE PER HECTARE	RATE PER 100ℓ WATER	REMARKS
Pome Fruit: Apples, Pears	2 ℓ	100 - 200 mℓ	Apply as a full cover spray at bud burst and repeat 10 to 14 days later if necessary. Apply a last application after harvest, but before leaf fall. Avoid treatment during flowering.
Stone Fruit: Peaches, Plums, etc.	2 ℓ	100 - 200 mℓ	Apply as a full cover spray at winter bud and repeat at pink bud. Apply again after harvest, but before leaf fall.
Bananas	1 ℓ	300 mℓ	Spray as required in 30 to 300 ℓwater per hectare. Repeat if necessary.
Grapes	1 ℓ	200 mℓ	Start application when the flower buds are visible, and again when the buds are separated, or at fruit set. Apply in 200 to 1 000 ℓwater/ha.
Brassicae	2 ℓ	400 mℓ	Apply at 4 to 8 leave stage in 50 to 500 ℓwater per hectare.
Potatoes	1 ℓ	300 mℓ	Apply once 7 days after 100% emergence in 200 to 500 ℓwater/ha.
Maize	1 ℓ	250 mℓ	Apply at 4 to 8 leave stage in 200 to 500 ℓwater/ha.
Cereals	1 ℓ	250 mℓ	Apply from tillering to when first node is detectable (Zadok's G.S. 20-31) in 200 to 500 ℓwater/ha.
Silage, Hay Pastures	1 ℓ	250 mℓ	Apply when grass growth is sufficient to absorb the spray (\pm 15 cm high) in 500 ℓwater/ha.
Pastures	1 ℓ	200 mℓ	Apply 10 to 14 days prior to turnout in 200 ℓwater/ha. Keep animals out of treated pastures 10 days after application to allow for nutrient uptake.
