

NUTRI COP

New Chelated Nutrition Technology

Nutri Cop is an amino acid chelated Copper containing liquid fertilizer, specifically designed for use as a foliar and fertigation nutrient source, to prevent and correct Copper deficiencies.

• **Category:**
Crop Nutrition Range

• **Formulation type:**
SL - Soluble Liquid

• **Guaranteed Analysis (w/v):**

| | |
|--------------|-------|
| *Copper (Cu) | 11.0% |
| Nitrogen (N) | 2.9% |
| Sulphur (S) | 5.6% |
| Amino Acids | 14.0% |

* Amino Acid & Carbohydrate chelated.

• **Physical Characteristics:**

| | |
|-------------------|-----------|
| pH | 2 – 6 |
| Density (at 20°C) | 1.2 – 1.4 |
| Physical state | Liquid |

• **Packaging:**

20 L
200 L
1000 L

Features & Benefits:

- Liquid formulation
- Natural chelating agent
- Instand plant availability
- Accelerated absorption by plant tissue
- Effective translocation and metabolism
- Compatible with most Agrochemicals

Compatibility:

Nutri Cop is compatible with most Agrochemicals, it is however advisable to do a miscibility test prior to tank mixing.

Application Methods:

Nutri Cop is designed for use as a foliar feed or fertigation and can be applied by:

Boom sprayer | Knapsack | Irrigation system

Sineria

NUTRI COP

Application Rates:

| METHOD | FOLIAR RATE/ HA | FERTIGATION RATE/ HA | REMARKS |
|----------------------------------|-----------------|----------------------|---|
| Fruit trees, wine & table grapes | 1-2 L | 4-5 L | Apply as a full cover spray as requires by plants |
| Grain and row crops | 1 | 2-3 L | Apply as a full cover spray as requires by plants |
| Vegetables | 1-2 L | 2-4L | Apply as a full cover spray as requires by plants |

Refer to product label for complete application rates per crop.

Handling & Precautions:

- Store in the original, well-sealed container away from direct sunlight in a cool dry environment.
- Keep away from children, uninformed people, animals and foodstuffs.
- Do not re-use the container.

Application Timing:

- Nutri Cop is recommended during periods when plant demand for Copper (Cu) is high, or when Copper (Cu) is deficient.
- Nutri Cop should preferably be applied in the early morning or late afternoon.
- Do not apply to plants that are undergoing a period of moisture or heat stress, or during cold wet conditions.
- Do not apply on wet fruit.
- For optimum results, Nutri Cop should be used in a balanced crop nutrition program.
- Do not apply in combination with or after the application of copper containing fungicides.
