

**Natural, effective and easy-to-use snake and other reptile repellent.**  
**Active Ingredient: Margosa Extract 5%**

Snake Away effectively repels snakes from around your home or structure.

~ Margosa extract refers to a natural product which does not contain any additional natural or synthetic components. The starting material for its production is the seed of the Indian neem tree, *Azadirachta indica*.

~ Its main components are fatty acids, such as oleic acid, stearic acid, linoleic acid and palmitic acid. These are present as glycerides or as free acids. Additional components include limonoids, such as nimbin, salannin and azadirachtin.

#### **Mode Of Application**

~ Apply around structures, houses, garages, gardens, sheds, woodpiles and other areas where snakes may be a problem.

**Snake Away™** creates a powerful odour/scent that snakes and other reptiles find unpleasant and triggers an avoidance behaviour that makes snakes and other reptiles want to escape the area where it is applied. Snakes can actually taste the air around them via a receptor organ known as the Jacobson's organ.

**Snake Away™** snake repellent does not harm snakes; it drives them away from areas where people, pets and children may be active. It has both preventive and repressive action.

## Application Procedure

**Always wear gloves when handling the product.**

**1.**

Open the package container by removing the lid, keeping it away from your face. Then scatter the product uniformly to the targeted surface (rocks, soil, etc.), from where you want to repel the reptiles.

**2.**

Calculate 40 g product per square meter (m<sup>2</sup>) of surface.

**3.**

Create a zone of 10-20 cm width around the area you want to protect.

Application Field	Targets	Application Rate	Application Timing
Outdoor areas	Snakes and other reptiles	40 gr/m <sup>2</sup>	Throughout the year
